- Bootstrap
- Redux
- Framer Motion
- Git & Github
- RESTful API development
- Ubuntu
- Jest
- NodeJs
- ExpressJs
- Postgresql
- Sequelize

EXPERIENCE

Frontend developer

Logatta | Amman, Jordan • July 2023 - December 2023

As a Frontend Developer at Logatta, I built scalable and maintainable frontend architectures using Next.js and React, delivering responsive, user-friendly web applications with seamless API integration. I collaborated closely with backend developers, designers, and product managers, using Git and Jira for project management.

Advanced web development with Javascript

Abdul aziz al ghurair school of advanced computing | Amman, Jordan • Apr 2023 - Oct 2023

A 6-month boot camp powered by Code Fellows. Throughout the program, I gained hands-on experience with the latest technologies and frameworks, including Node.js, React, Express, and PostgreSQL. I learned how to design and build scalable and dynamic web applications from scratch. The program also included comprehensive training in data structures. Additionally, I had the opportunity to work in teams to solve problems and create projects.

EDUCATION

Bachelor of Software Engineering

Zarqa university | Zarqa, Jordan • 2019 - 2022

PROJECTS

Virtual Intreviewer & Virtual Conversationalist
